Attached are maps that show locations of where various fish species were collected. The only fish collected over time has been smallmouth bass, and only PCBs have been analyzed – so, very limited data. Below are a presentation of the data trends for SMB.

Kristine Koch
Remedial Project Manager
USEPA, Office of Environmental Cleanup

U. S. Environmental Protection Agency
Region 10

Subject: Fish tissue figure

Are there any figures with fish tissue concentrations? Overtime, by location, etc...

Thanks,

Doug Tomchuk
